

Opsole Migrate

Seamless, Secure, and Intelligent Device Migration

Effortless Migrations. Zero Disruptions. Full Control

Opsole Migrate is an advanced agentless solution purpose-built to simplify and automate the migration of Windows 10/11 devices to Entra ID—delivering a seamless experience that preserves user productivity and maximizes IT efficiency.

 Agentless

 Full Visibility

 Zero Downtime

Why Choose Opsole Migrate?

User-Driven, IT-Free Migrations

Empower users to complete secure device migrations in minutes—no IT handholding required.

Agentless by Design

Eliminates the need for local agents—simplifies deployment and reduces maintenance.

Zero Disruption for Users

Preserve user profiles, apps, and settings—no retraining, reconfiguring, or productivity loss.

15-Minute Migrations at Scale

Empower users to complete secure device migrations in minutes—no IT handholding required.

Purpose-Built Automation

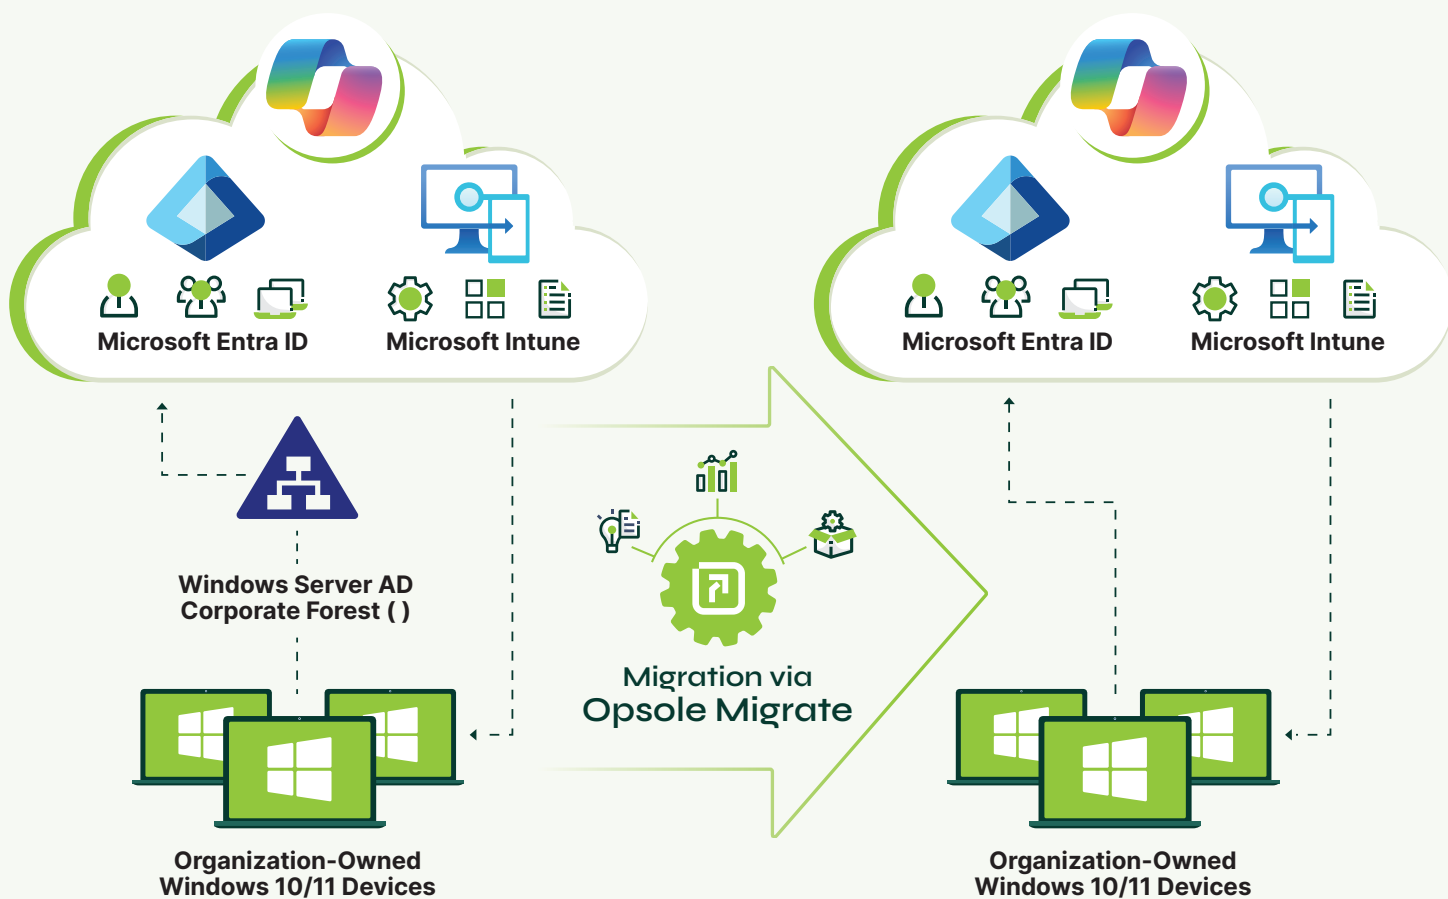

Eliminates the need for local agents—simplifies deployment and reduces maintenance.

End-to-End Data Integrity

Preserve user profiles, apps, and settings—no retraining, reconfiguring, or productivity loss.

Beyond Migration : Powerful Enterprise Features

Unlock more than just seamless migrations—Opsole Migrate delivers intelligent automation, deep visibility, and unmatched scalability for modern IT environments. adoption at scale.

As organizations shift to Microsoft Entra ID, traditional device migration methods—relying on scripts, VPNs, and manual steps—prove slow, costly, and disruptive. Opsole Migrate streamlines this transition with an agentless, unified platform that automates migrations and centralizes key post-migration tasks like BitLocker backup, real-time insights, and inventory management. It's a modern solution built to reduce overhead, improve security, and support seamless cloud adoption at scale.

Functionality Beyond Migration

BitLocker Key Backup

Auto-syncs keys to Entra ID for compliance and security

Unified Admin Dashboard

Real-time progress, audit logs, and full device visibility

Device Inventory

View hardware and user info for onboarded devices

Software Inventories

Access app-level install data via Intune app discover

Migration Insights

See status, logs, and device details in realtime

Cost-Saving Automation

Cut manual effort and reduce overhead

User-Initiated Migration

Empowers remote users to start migration themselves

Planned Rollouts

Migrate by group, region, or schedule with no disruption

Enterprise Scalability

Manage thousands of global migrations easily

Security & Data Integrity

Secure data, profiles, settings, and apps remain untouched

Revolutionizing device migration for a smarter tomorrow
